

Acceptable File Types & Setup Guidelines

If you don't see a file type here that your able to provide we can still help! Talk to our graphics manager for more details

Vector files contain anchor points, lines and curves which allow unlimited scaling and sizing without a loss in quality. Files designed in Adobe 1998 RGB Color Space will provide the best color output.

We accept the following **VECTOR** files **WITH** a hardcopy:
(Please note vector file recommendations)

PREFERRED:

Adobe CS2 or Earlier: *.ai
Adobe CS2 or Earlier: *.eps
Adobe: *.pdf

ALSO ACCEPTED:

Autocad: *.dxf (2d only)
Corel: *.cmx
Corel: *.cdr
Gerber: *.plt
Gerber: *.gad

Image, or raster files are composed of individual squares of color called pixels . When millions of pixels are put together, they create an image or picture. Files designed in Adobe 1998 RGB Color Space will provide the best color output.

We accept the following **IMAGE** files **WITH** a hardcopy:
(Please note resolution recommendations)

PREFERRED:

Tiff: *.tif (flattened with LZW compression)
Photo Shop: *.psd (flattened)

ALSO ACCEPTED:

JPEG: *.jpg (with minimal compression)
Bitmap: *.bmp

Vector File Recommendations

If images are present in the file, the source files must be provided separately.
ALL text must be converted to curves or outlines.

Resolution Recommendations

Keep in mind that the file resolution is only as good as your original. Simply resizing an image (adding pixels) will not necessarily improve image appearance. The following table gives a general idea of what PPI (or Pixels Per Inch - sometimes referred to as DPI) is necessary to obtain a good finished product

Viewing Distance	1' or less	2' - 3'	3' - 5'	5' - 7'
Recommended Pixels Per Inch	200-300	150	100	75

Generally, images from the web are not scaleable to sizes larger than what they appear to be on your monitor.

For a small fee of \$12 per image, you can use our high-quality image resource to find good stock images.

The website is www.photospin.com

Simply write down the image number(s) you want and give the number(s) to us to process.

Acceptable Media / Transfer Options

USB Thumb Drives • CD • DVD • Photographs • Slides • Digital Pictures • Email: 5mb max
FTP: No maximum file size - See information below for details

It's Right! It's On Time! It's Guaranteed!
